Severe Weather Outlook Wednesday, June 28, 2017

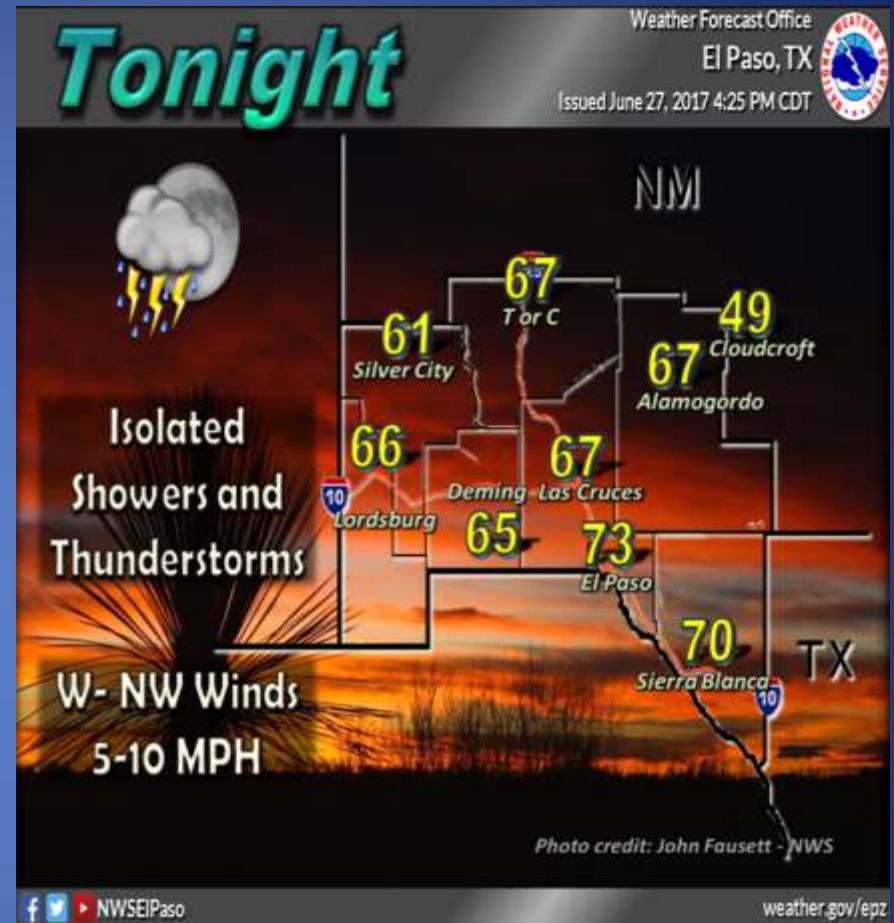

National Weather Service
Storm Prediction Center

<http://www.spc.noaa.gov>

Hazardous Weather

Strong to severe storms will be possible across northern Oklahoma Thursday evening and overnight.

With lesser moisture in place, showers and thunderstorm activity will be significantly reduced this evening...and likely absent overnight as most of the activity subsides around midnight. Otherwise a seasonal night with clearing skies and slackening winds

Hazardous Weather

Warmer Today!

Today will be slightly warmer with storms possible over the mountains.

Weather Forecast Office
Midland/Odessa, TX
Issued June 28, 2017 6:31 AM CDT

High Temperatures

Storm Chances

f t v NWSMidland

weather.gov/maf

Temperatures will be in the 90s and lower 100s across the region today with a slight chance of afternoon storms in the Davis Mountains

Late Friday Night/Saturday Morning Thunderstorm Setup

National Weather Service Fort Worth

- Scattered to numerous storms are possible near a stalled front.
- Strong to severe thunderstorms will be possible. The main hazards will be damaging winds, but near-severe hail cannot be ruled out.
- Heavy rain may also result in some isolated instances of flash flooding.
- Check back to the forecast for additional details!

@NWSFortWorth
weather.gov/FortWorth

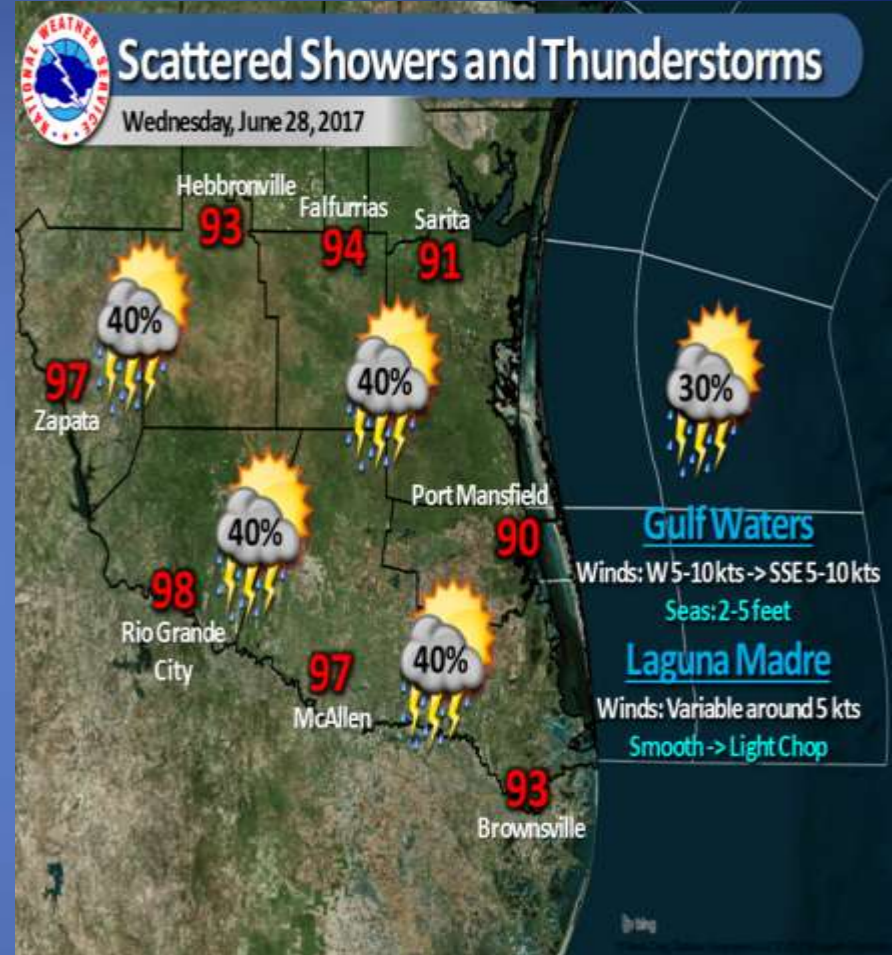

433 AM CDT
Wed Jun 28 2017
National Weather Service
Fort Worth, TX

There will be a risk for strong to severe thunderstorms late Friday night into early Saturday morning as a complex of storms will likely race southeastward through parts of North and Central TX. Strong to severe thunderstorms are possible with the main risk being damaging straight line winds. Some near severe level hail cannot be completely ruled out. Heavy rain may also result in some minor instances of flash flooding.

Hazardous Weather

Isolated to scattered showers and thunderstorms expected mainly over the Coastal Bend and Victoria Crossroads Today. Highs will range from the upper 80s Coast to the mid 90s West

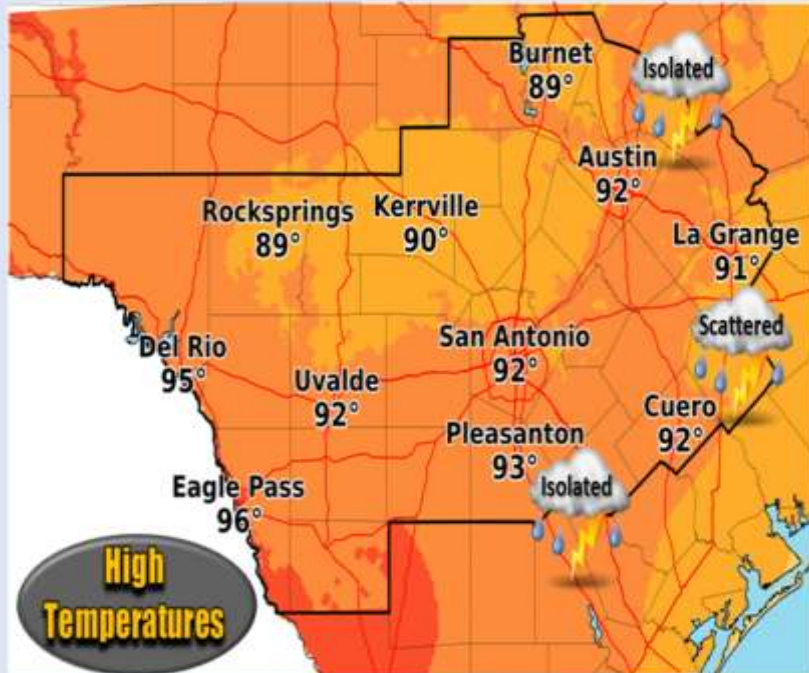

Scattered rain showers and thunderstorms are possible today across Deep South Texas with a weak low pressure system along the coast. Temperatures will range from the lower 90s closer to the coast to the upper 90s out west. For the mariners, expect light variable/shifting winds with the development of a light chop on the bay and seas of 2 to 5 feet across the coastal gulf waters out to 60 nautical miles

Hazardous Weather

Near Normal High Temperatures; Isolated to Scattered Storms East

National Weather Service Austin / San Antonio

YouTube f @NWSsanAntonio
weather.gov/ewx

Isolated to scattered showers and thunderstorms remain possible today, mainly for areas along and east of the Interstate 35 corridor. Otherwise, high temperatures will range from the upper 80s to the mid 90s.

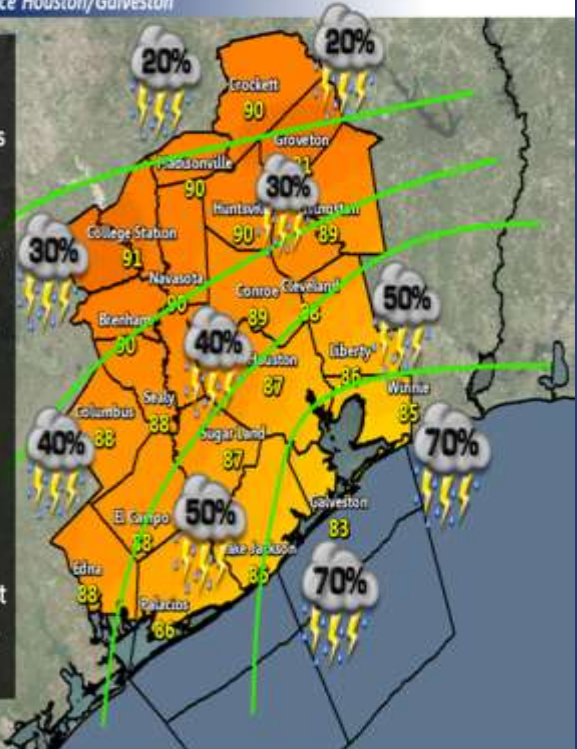

Today's Forecast

National Weather Service Houston/Galveston

Scattered to widespread showers and thunderstorms will be possible across SE Texas again today, especially along the coast. Activity will start out over the Gulf and near the coast this morning before moving inland this afternoon.

Isolated heavy rainfall and brief tropical funnel clouds/waterspouts will be possible with these storms today.

High temperatures are forecast in the mid 80s to low 90s with heat indices in the 90s.
